PLASTIC DOME FOR 250 KG DRUM
Diameter 510 mm

FLEXIBLE HOSE connecting the dome to the welding unit
internal diameter: 3,5 and 5,5 mm - length: 3,5 and 5,5 m - On request, it is also available in the following size: 1/1,5/2/2,5/3 mts

FILLET FOR CONNECTION HOSE

Description

- 1 • Drum
- 2 • Cover
- 3 • Internal pierced cone
- 4 • Stick
- 5 • Wire
- 6 • Nut
- 7 • Lock nut
- 8 • Liner

Directions for use

- Let the wire crossing the cone from the internal after removing the stick lock cone;
- Unwind the wire for some metres, pierce the middle of the cover, put the nut on little hole from the outside and the lock nut from the inside;
- Fix the liner on the nut and fush wire in the nut/liner before closing the cover.

Eco-pack

- Ecologic because it is completely recyclable
- Easy handling packing (each drum on a mini-pallet)
- Innovative winding of wire
- No wire crossing

Advantages

- No need plastic domes
- Wire without torsion and helix
- Regular slide in the nozzle (increase life of the nozzle)
- Storage optimization

Warning
